

STREETBRICK- XL - CUSTOM PATTERN

Product: STREETBRICK- XL FDOT s523-1 PATTERNED / PAVEMENT

Location: City of Lauderhill

Specification: Custom double medallion pattern with full border Color: Sun Baked Clay

Project requirements:

- Mechanically imprinted asphalt (3/8" depth) (not a veneer surface) this type system offers the only traffic rated decorative surface that is renewable by simply recoating as needed (7- 10) years on average at a nominal cost. The system is the only product that actually stamps the asphalt with the chosen pattern in a permanent manner that resembles as close as possible the 3 dimensional look of brick pavers.
- Ability to be installed on existing 5 year old asphalt

STREETBRICK- XL - CUSTOM PATTERN

- ADA compliant
- Exact (pantone) color matching
- Maintain a high coefficient of friction for the design life of the surface (7- 10 years)
- Meet and exceed the stringent design requirements of almost any project.
- Integral Colored coating

Project goals:

Transform existing standard crosswalks into aesthetically pleasing and eye catching custom designed crosswalks with the intent of providing a beautiful gateway to the newly refurbished public park.

Results:

To this day the City of Lauderhill is very impressed and satisfied with the performance of the streetscape design as installed by Atlantic Paving.
